Math Games ... Much More Than Games

Workshop Dates: February 2 and March 30, 2017

Participants: French and English math teachers from Kindergarten to Cycle 3; math consultants, principals

Registration Deadline: Wednesday, January 25, 2017 at noon

Place: 600 Fullum, room 11:40

Workshop Description:

This offer of services is addressed to all school stakeholders, math consultants, principals, teachers (French and English) as well as daycare staff. You are invited to reflect, based on data from research, on practices that favor learning in underprivileged areas particularly regarding the teaching of mathematics. We will explore Math Games as a powerful tool in support of learning.

Goals:

- To know and understand successful interventions in disadvantaged areas
- To become familiar with teaching practices in mathematics deemed effective in disadvantaged areas
- To explore tools that encourage and support the learning of mathematics in disadvantaged areas

Note: The workshops and the materials will be in both French and English.

Resources:

Richard Moisan, ressource professionnelle, *Une école montréalaise pour tous*

Ivana Colatriano, professional resource, *A Montreal School for All.*
